

LA OPG Invoicing System

Team Reference Guide — How the Reporting & Invoicing Program Works

This guide walks through every screen of the LA OPG invoicing program: the main menu, customer management (add, edit, delete, locate), and invoice management (create, edit, delete, print). Each section includes a screenshot of the actual screen along with a field-by-field explanation, so any team member can follow along and understand exactly how the system works.

Contents

1. Invoicing Main Menu
2. Add New Client (New Customer)
3. Edit Customer
4. Delete Customer
5. Locate Customer
6. Add Invoice (Create New Invoice)
7. Edit Invoice
8. Delete Invoice
9. Print Invoice
10. Printed Invoice (Sample Output)
11. Payments

202303199		08/08/2023	130.00	0.00	0.00

This is the home screen of the program. Every task — managing customers or managing invoices — starts here. The screen is split into a toolbar, a customer information panel, and a list of invoices belonging to whichever customer is currently loaded.

Top Toolbar (Customer Actions)

New Customer	Opens a blank form to add a brand-new client/account.
Edit Customer	Opens the currently loaded customer's record so its details can be changed.
Delete Customer	Permanently deletes the currently loaded customer and every invoice under that account.
Locate Customer	Searches for and switches to a different customer account. See Section 5.

Payments	Opens the payments screen for recording money received against invoices.
Show Memo	Displays any saved notes/memo attached to the account.
Exit Program	Closes the application.

Right Toolbar (Invoice Actions)

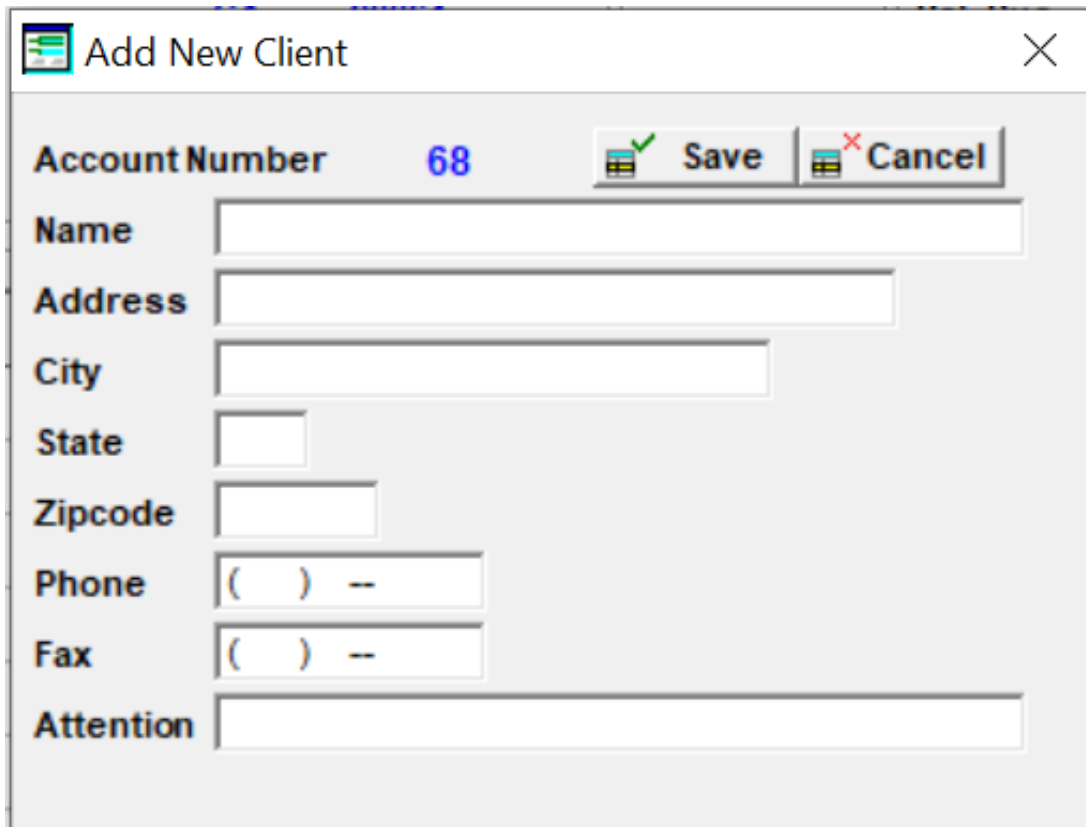

Add Invoice	Creates a new invoice for the currently loaded customer.
Edit Invoice	Opens the invoice currently selected/highlighted in the grid below for editing.
Delete Invoice	Permanently deletes the invoice currently selected in the grid.
Print Invoice	Prints either the selected invoice or all invoices for the account.

Customer Panel & Invoice Grid

- The **Customer** and **Customer Phone** panels show the details of whichever account is currently loaded (name, address, phone, fax, balance due, payments made).
- The **Customer Invoices** grid at the bottom lists every invoice tied to that account, with columns for invoice number (invno), PO number (pono), date (datein), total, credit, and balance owed (ttow).
- **Previous** / **Next** buttons step through customer accounts one at a time.
- **All Invoices** opens a full invoice list for the account.

Note: Whichever customer is loaded on this screen is the customer that every button — Edit, Delete, Add Invoice, etc. — will act on. This is why Locate Customer (Section 5) is the key first step whenever you need to work on a specific account.

02 Add New Client (New Customer)

Add New Client [Close]

Account Number 68 [Save] [Cancel]

Name [Text Field]

Address [Text Field]

City [Text Field]

State [Text Field]

Zipcode [Text Field]

Phone () -- [Text Field]

Fax () -- [Text Field]

Attention [Text Field]

Click **New Customer** from the Main Menu to open this form and register a brand-new client account.

Fields

Account Number	Assigned automatically by the system (shown in blue). Cannot be edited — it identifies the account for the life of the customer.
Name	Company or client name.
Address	Street address.
City	City name.
State	Two-letter state code.
Zipcode	ZIP / postal code.
Phone	Main contact phone number.

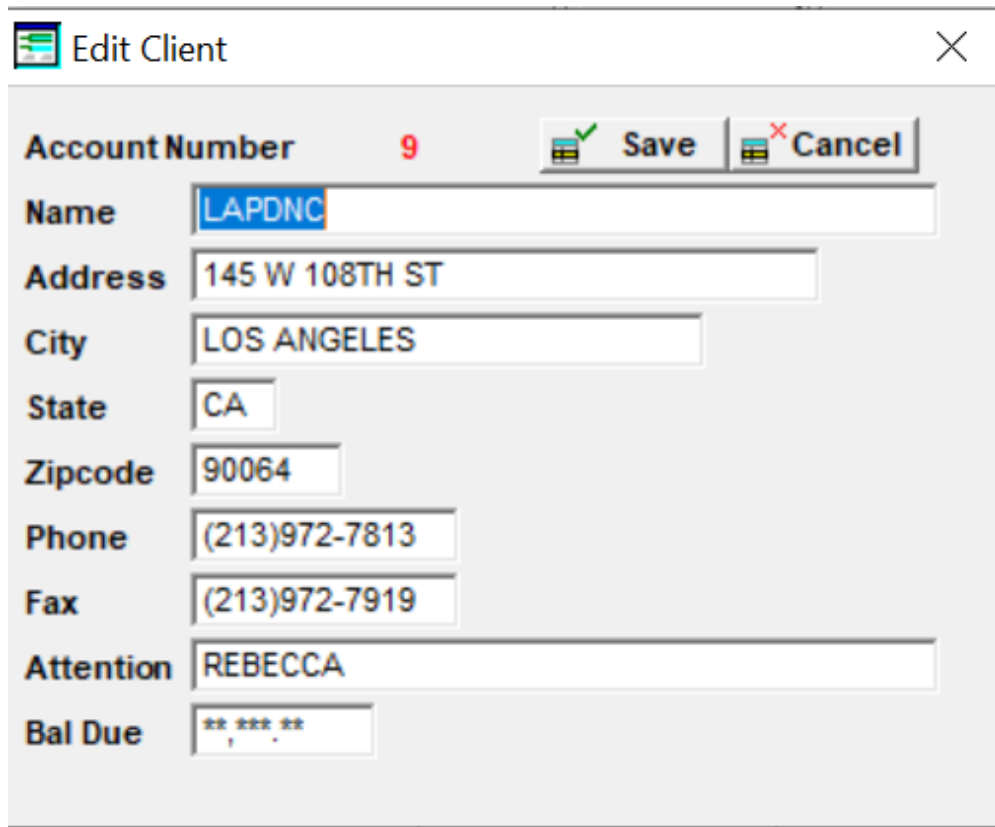

Fax	Fax number, if applicable.
Attention	The specific contact person at that company.

Buttons

Save	Creates the new customer account with the entered details.
Cancel	Closes the form without saving anything.

Note: Edit Customer, Delete Customer, and Locate Customer all work together as one workflow: Locate Customer is used to find and switch to a customer, and once that customer is loaded, Edit Customer or Delete Customer will apply to that same, now-active customer.

03 Edit Customer

The screenshot shows a software window titled "Edit Client" with a close button (X) in the top right corner. Below the title bar is a toolbar with a "Save" button (green checkmark icon) and a "Cancel" button (red X icon). The main area contains several labeled text input fields:

- Account Number**: 9 (displayed in red, indicating it is read-only).
- Name**: LAPDNC
- Address**: 145 W 108TH ST
- City**: LOS ANGELES
- State**: CA
- Zipcode**: 90064
- Phone**: (213)972-7813
- Fax**: (213)972-7919
- Attention**: REBECCA
- Bal Due**: ** , *** **

Click **Edit Customer** from the Main Menu to open the currently loaded customer's record for editing. Use **Locate Customer** first if you need to switch to a different account before editing (see Section 5).

Fields

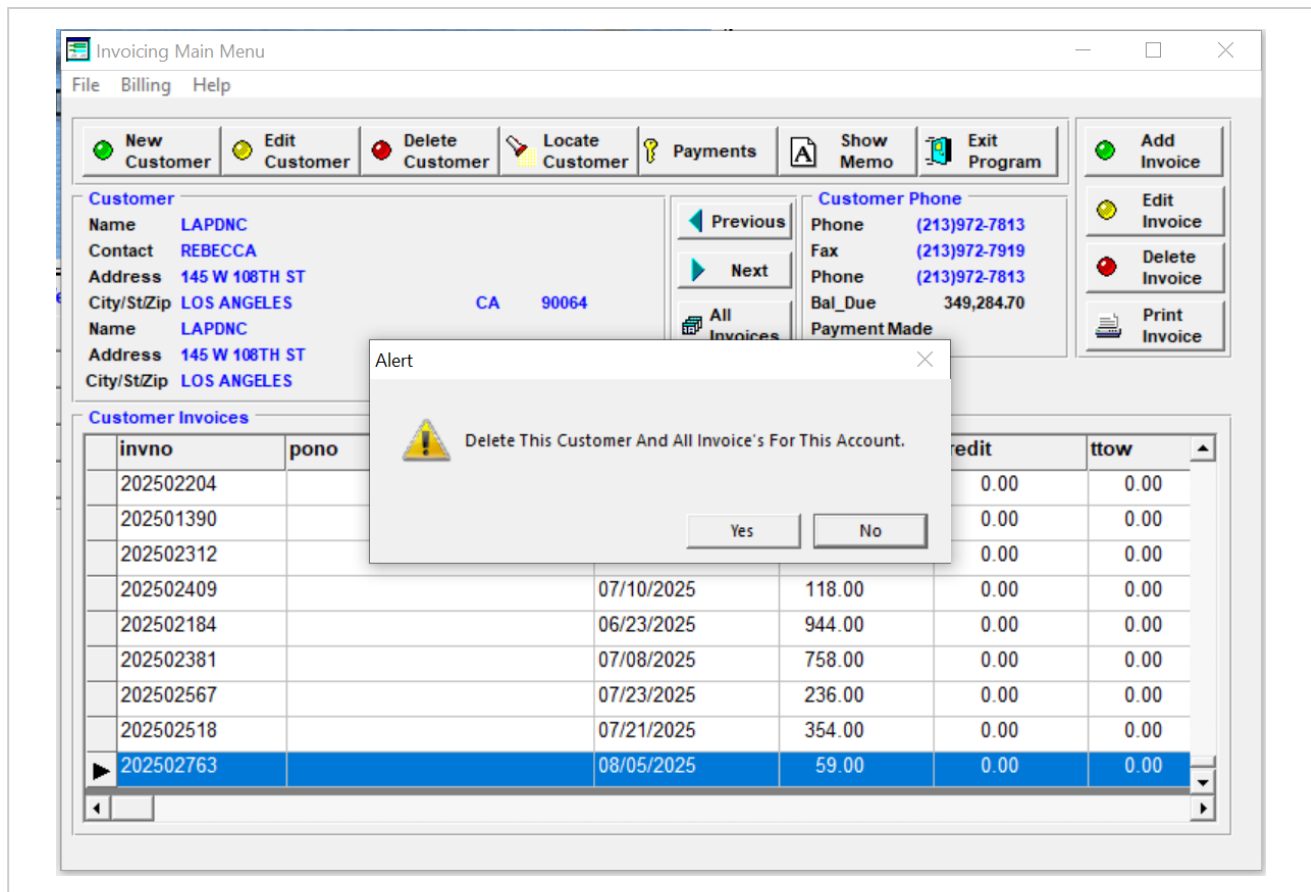

Account Number	The customer's permanent ID number (shown in red here, read-only).
Name	Editable company/client name.
Address	Editable street address.
City	Editable city.
State	Editable state code.
Zipcode	Editable ZIP code.
Phone	Editable phone number.

Fax	Editable fax number.
Attention	Editable contact person name.
Bal Due	Balance due for the account — display only, calculated from invoices and payments, cannot be typed into.

Buttons

Save	Saves any changes made to the customer's information.
Cancel	Closes the form without saving changes.

04 Delete Customer

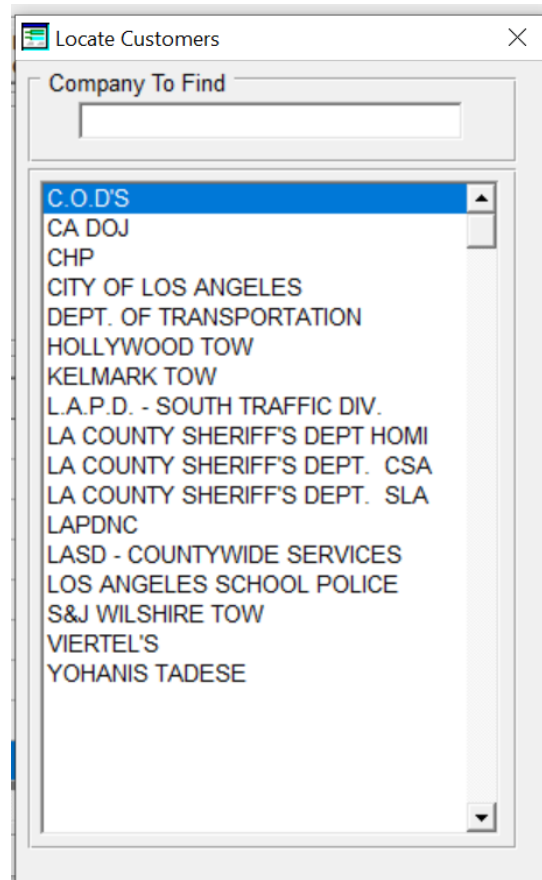

Clicking **Delete Customer** on the Main Menu brings up a confirmation alert before anything is removed. This action deletes the customer **and every invoice** recorded under that account.

Alert message	"Delete This Customer And All Invoice's For This Account."
Yes	Confirms the deletion — the customer account and all of its invoices are permanently removed.
No	Cancels the action — nothing is deleted.

Note: This is a permanent, irreversible action once confirmed with Yes. Always double-check that the correct customer is loaded (using Locate Customer) before confirming a delete.

05 Locate Customer

Click **Locate Customer** from the Main Menu to search for and switch to a different customer account. This is how you change which account is active before editing, deleting, or adding invoices.

How it works

- Type part of a company name into the **Company To Find** box to filter the list, or simply scroll through it.
- Click a company name in the list to select it.
- Once selected, that customer becomes the **active/loaded customer** on the Main Menu — its details, phone numbers, balance due, and invoice list will all update to match.

Note: From this point forward, every other action on the Main Menu — Edit Customer, Delete Customer, Add Invoice, Edit Invoice, Delete Invoice, Print Invoice — applies to the customer you just located. This is the same behavior described for Edit and Delete Customer above: Locate Customer changes the active account, and every subsequent action follows that account.

06 Add Invoice (Create New Invoice)

Add Invoice

Account Number: **66** KELMARK TOW
620 E. 111TH PLACE
LOS ANGELES, CA. 90059-

Invoice Number: **0**

Customer Info

Name: YOHANIS TADESE Date In: 07/17/2026
Address: ADDIS ABEBA, ETHIOPIA P.O. #

Model:

Tow Charges

Tow From: Tow To: 0.00
Tow Out: 0.00
Storage: 0.00 Per Day From: / / To: / / 0.00
City Parking Tax: 0.00
City Vehicle Release Fee: 0.00
Lien Processing Fee: 0.00
Labor: 0.00
Miles Towed: 0 Price Per Mile: 0.00
Method Of Payment:
Total: 0.00
Amount Paid: 0.00
Balance Due: 0.00

Save Cancel Open Memo

Click **Add Invoice** from the Main Menu to create a new invoice for the currently loaded customer (shown at the top of this form, e.g. Kelmark Tow).

Header

Account Number	The active customer's account number (read-only, shown in red).
Invoice Number	Shows 0 until the invoice is saved, at which point the system assigns the next invoice number automatically.

Customer Info

Name / Address / City / State / Zipcode / Phone	Pulled automatically from the active customer's account.
Date In	Date the tow/job came in — defaults to today's date.
P.O. #	Purchase order number for this job, if provided.

Bill To

A separate, editable set of Name / Address / City / State / Zipcode / Phone fields. This lets an invoice be billed to a different party than the account's default customer info, if needed.

Vehicle Info

Make / Model	Vehicle make and model.
License No. / State	Vehicle license plate number and issuing state.
Agency	Dropdown selecting the requesting agency (e.g. LAPD, CHP, Sheriff).
Reason	Reason for the tow.
Driver	Name of the tow driver.

Tow Charges

Tow From / Tow To	Pickup and drop-off locations, each with its own charge amount field to the right.
Tow Out	Additional tow-out description/charge field.
Storage	Daily storage rate, with a From/To date range to calculate total storage days and charge.
City Parking Tax	Flat tax charge amount.
City Vehicle Release Fee	Flat release fee amount.
Lien Processing Fee	Flat lien fee amount.

Labor	Labor description with its charge amount.
Miles Towed / Price Per Mile	Distance towed and the rate per mile; multiplied together to get the mileage charge.
Method Of Payment	Dropdown to record how the invoice was/will be paid.
Total	Sum of all charge fields above — calculated automatically.
Amount Paid	Amount already paid toward this invoice.
Balance Due	Total minus Amount Paid — calculated automatically.

Buttons

Save	Saves the invoice and assigns it a permanent invoice number.
Cancel	Closes the form without saving.
Open Memo	Opens a memo/notes field attached to this invoice.

Open Memo

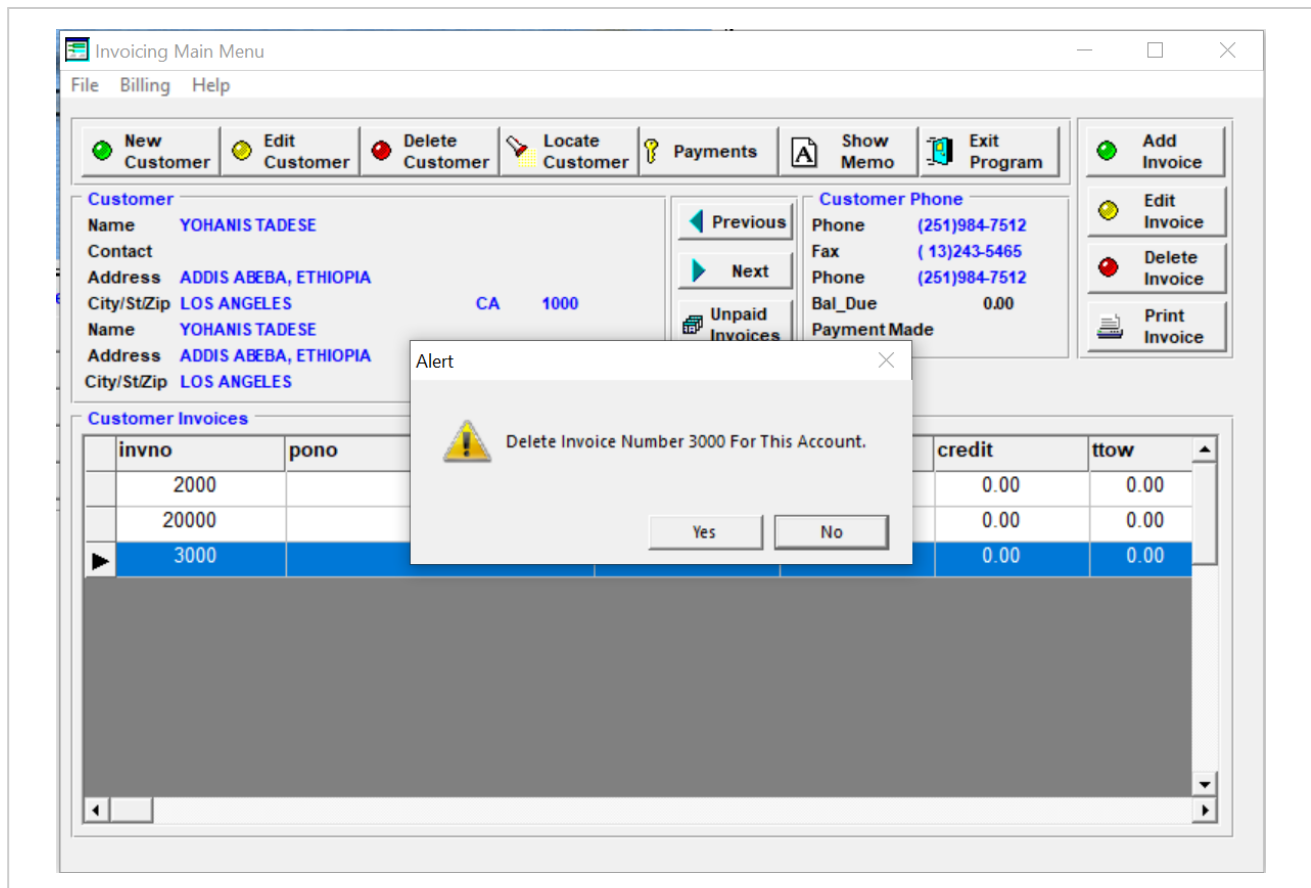

Select an invoice in the Customer Invoices grid on the Main Menu, then click **Edit Invoice** to open it. The layout is identical to Add Invoice, but every field is pre-filled with the invoice's saved data, and the **Invoice Number** now shows the real, permanent invoice number (in red) instead of 0.

What can be changed

- All Customer Info, Bill To, Vehicle Info, and Tow Charges fields can be updated the same way as when the invoice was created.
- Total and Balance Due recalculate automatically as charge fields are changed.
- **Save** commits the changes; **Cancel** discards them; **Open Memo** opens the invoice's notes.

Note: Editing an invoice does not change its Invoice Number or Account Number — only the details within it.

08 Delete Invoice

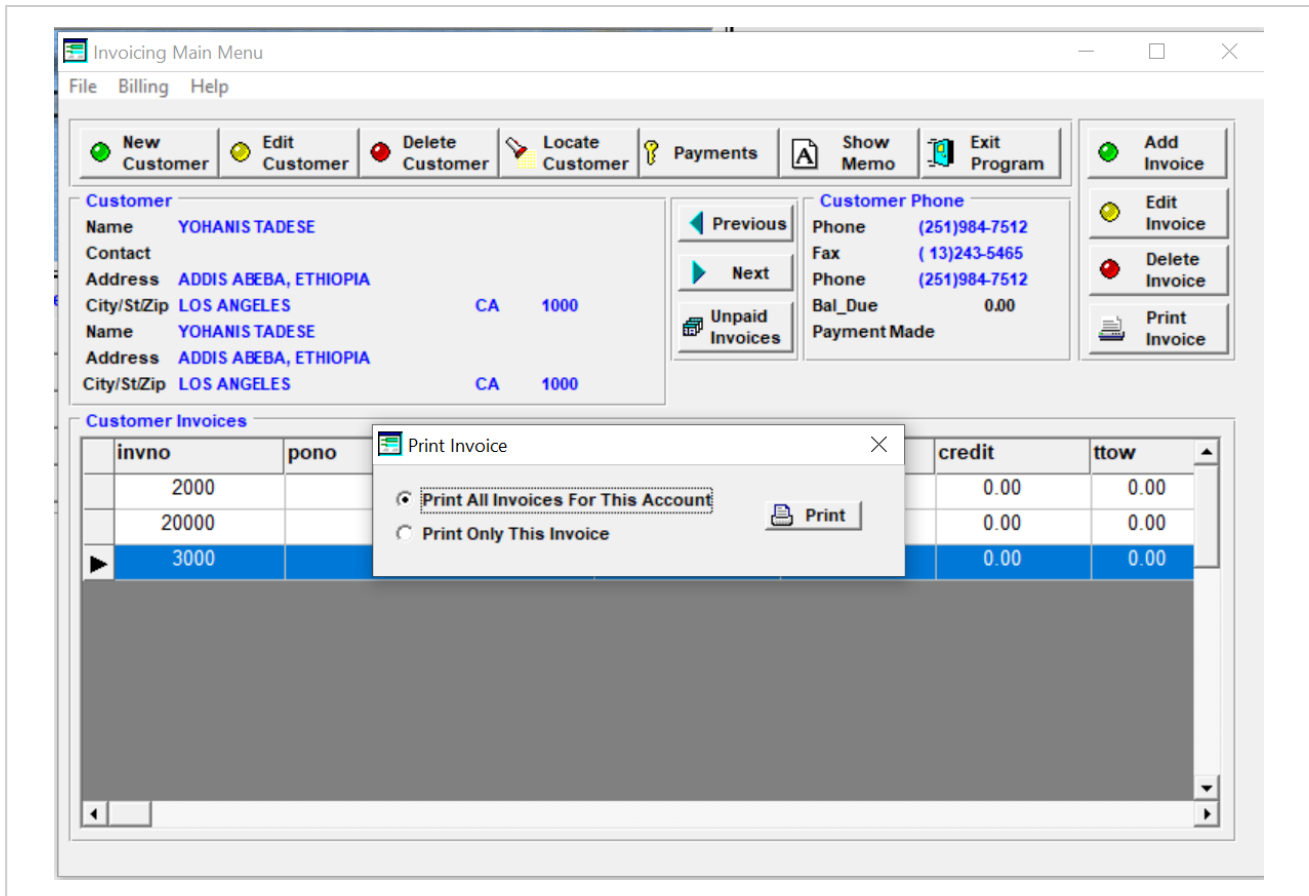

Select the invoice to remove in the Customer Invoices grid, then click **Delete Invoice**. A confirmation alert appears before anything is removed.

Alert message	"Delete Invoice Number [X] For This Account."
Yes	Permanently deletes that single invoice from the account.
No	Cancels the action — the invoice is kept.

Note: Unlike Delete Customer, this only removes the one selected invoice — other invoices on the account are not affected.

09 Print Invoice

Select an invoice in the grid, then click **Print Invoice** to open the print options dialog.

Print All Invoices For This Account	Prints every invoice on file for the currently loaded customer.
Print Only This Invoice	Prints just the invoice currently selected in the grid.
Print	Sends the chosen selection to the printer.

10 Printed Invoice (Sample Output)

		KELMARK TOW 620 E. 111TH PLACE LOS ANGELES , CA. 90059-		Invoice Number 2000 Account Number 66	
Customer Info					
Name	YOHANIS TADESE			Date In	07/17/2026
Address	ADDIS ABEBA, ETHIOPIA			P.O. #	
City	LOS ANGELES	State	CA	Zipcode	1000 Phone (251)984-7512
Vehicle Info					
Make		License No.		State	
Model				Location	
				By	
				Type	
Tow Charges					
Tow From					
Tow To					0.00
Tow Out					0.00
Storage	0.00 Per Day	From		To	0.00
City Parking Tax					0.00
City Vehicle Release Fee					0.00
Lien Processing Fee					0.00
Extra Charges					0.00
Miles Towed	0	Price Per Mile	0.00		0.00
					Total 0.00

This is what an invoice looks like once it is printed (choosing **Print Invoice** from the Main Menu, as covered in Section 9). It carries the official OPG (Official Garage Unit) logo and lays out the same information entered on the Add/Edit Invoice screen in a clean, printable format.

Layout

Header	OPG logo on the left; business name and address (e.g. Kelmark Tow) in the center; Invoice Number and Account Number on the right.
Customer Info	Name, Address, City, State, Zipcode, Phone of the billed customer, plus Date In and P.O. #.
Vehicle Info	Make, Model, License No., State, Location, By, Type, and Driver for the towed vehicle.
Tow Charges	Tow From, Tow To, Tow Out, Storage (with Per Day rate and From/To dates), City Parking Tax, City Vehicle Release Fee, Lien Processing Fee, Extra Charges, Miles Towed with Price Per Mile, and the final Total.

Note: The printed invoice is a read-only summary — it cannot be edited here. To change any details, go back to Edit Invoice (Section 7), save the changes, then print again.

11 Payments

The screenshot shows a software window titled 'PAYMENTS' with a close button (X) in the top right corner. The window is divided into several sections:

- Account Information:**
 - Account Number: 8
 - Business Name: KELMARK TOW
 - Address: 620 E. 111TH PLACE, LOS ANGELES, CA. 90059-
 - Invoice Number: 202203506
- Payment Info:**
 - Date Paid: 07/17/2026
 - Method Of Payment: Credit Card (dropdown menu is open showing options: Credit Card, Cash, ATM, Check, Charge File)
 - Amount: 0.00
- Payment Record:** A table with two columns: 'Date Paid' and 'Method Of Payment'. The table is currently empty.
- Balance Due:** 248.50
- Buttons:** 'Save Payment' (with a green checkmark icon) and 'Close' (with a red X icon) are at the bottom. A 'Remove Payment' button is located next to the balance due.

Click **Payments** from the Main Menu to record a payment against an invoice. The invoice must be selected/loaded first, since this screen ties a payment to one specific Invoice Number and Account Number.

Payment Info

Account Number / Invoice Number	Shown at the top (read-only) so you can confirm which account and invoice the payment is being applied to.
Date Paid	Date the payment was received — defaults to today's date.
Method Of Payment	Dropdown: Credit Card, Cash, ATM, Check, or Charge File.
Amount	Dollar amount being paid.

Payment Record & Balance

Payment Record grid	Lists every payment already made on this invoice, with Date Paid and Method Of Payment for each.
Balance Due	The remaining amount owed on the invoice, updated automatically as payments are added or removed.

Buttons

Save Payment	Records the payment entered in Payment Info and adds it to the Payment Record grid.
Remove Payment	Deletes a payment selected in the Payment Record grid, adding that amount back to the Balance Due.
Close	Closes the Payments screen.

End of Guide

That covers the full workflow: manage customers with New / Edit / Delete / Locate Customer, manage their invoices with Add / Edit / Delete / Print Invoice, see the final Printed Invoice output, and record money received with Payments. Locate Customer is the connector that ties it all together — it determines which customer every other action applies to.
